

Supply Chain and Medication Resource Challenges: The Risk to Patient Safety

2:00 p.m. - 3:00 p.m.

[Click Here to Register](#)

New York's healthcare industry is facing an unprecedented resource crisis. The supply chain disruptions leading to a scarcity of necessary medications and supplies are challenges facing healthcare organizations and providers across the state. The lack of available resources increases the potential for delayed or inadequate care to patients, and may result in liability claims against a physician. Join us as MLMIC discusses the risks associated with healthcare resource challenges, and offers insight into how to mitigate these challenges in your organization and reduce the risk of harm to your patients.

Upon completion of this program, participants should be able to:

- Identify the significant state-wide supply chain and medication resource challenges affecting the healthcare industry in New York.
- Discuss the how these resource challenges impact patient safety and the financial strength of healthcare organizations.
- Implement risk management strategies to minimize the patient safety and professional liability risks associated with these resource challenges to you and your organization.

MLMIC is accredited by the Medical Society of the State of New York (MSSNY) to provide continuing medical education for physicians.

MLMIC designates this live internet activity for a maximum of *1.0 AMA PRA Category 1 Credit™*. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Target audience: Physicians of all specialties
